

ALTANA advises on the sale of MC2 TECHNOLOGIES, a gem of French high-tech

ALTANA assists the majority shareholders of MC2 TECHNOLOGIES in its sale to ANDERA PARTNERS and BPIFRANCE.

Sales of drones have grown exponentially in recent years. Misused, these devices pose increasingly serious threats against which both States and private actors must be able to protect themselves. MC2 TECHNOLOGIES, a specialist in microwave technologies, is particularly focused on the neutralization of these devices.

ALTANA's clients have supported the development and growth of MC2 TECHNOLOGIES over the past 6 years, enabling it to position itself in a highly promising high-tech market segment.

The majority of the capital is taken by the ANDERA PARTNERS and BPIFRANCE fund, which become the majority shareholders, alongside the founders who have opted to reinvest.

Founded in 2004, MC2 TECHNOLOGIES has become a major player in the field of drone fighting and Hidden Object Detection in recent years. Its radars, drone jammers, and passive cameras are used by police forces and the military, both in France and abroad.

The company was cited as one of the " Champions for Growth 2021 " by the magazine Les Echos.

The ALTANA team on this project, was composed of Jean-Nicolas Soret, corporate M&A partner, Arthur Boutemy, corporate M&A lawyer, Philippe de Saint-Bauzel, tax partner and Stéphanie Nègre, tax counsel. The know-how of our teams has proven to be essential on this transaction - given the sensitivity of MC2 TECHNOLOGIES' activity.

ABOUT ALTANA

Altana is a multi-practice law firm founded in 2009. The firm's teams of 80 lawyers and legal advisers, including 22 partners, favor a cross-disciplinary approach to expertise and sectors. Altana's teams assist French and foreign companies, as well as their managers, in dealing with high-stakes technical or strategic cases, particularly in the most regulated sectors: Banking Energy, Life Sciences, TMT (Technology-Media-Telecommunications).
