INTRODUCING THE ADVANT UPC LITIGATION TEAM

- As of 1st June 2023, the **Unified Patent Court** (UPC) became fully operational.
- The UPC is a new European system, based on its own rules, which works predominantly in English.
- The UPC will deliver decisions on patent infringement and revocation cases covering most economies of the European Union.
- **ADVANT**, thanks to the combination of its dispute resolution practices in France, Germany and Italy, has set up a UPC litigation team to ensure our clients take full advantage of the new system.
- **ADVANT**'s clients can benefit from the outstanding know-how of our UPC litigators to ensure effective protection of their interests concerning Unitary Patents.
- With 11 offices in the European Union and a total of 15 offices worldwide, **ADVANT** is ideally positioned to meet the challenges posed by the UPC litigation.

OUR UPC LITIGATORS FROM FRANCE
